

and other states. The unregulated flow of trash from Canada into Michigan and other states creates significant environment and public health concerns.

Even more alarming; a January 2006 audit conducted by the Department of Homeland Security has shown that these trucks are often found containing medical waste, illegal drugs, and illegal currency.

This report raises significant border security and national safety concerns that must be addressed.

This legislation would give residents of Michigan and other states the power to limit the trash from outside the United States they are currently forced to accept.

I look forward to continuing to work with supporters on both sides of the aisle to move this legislation to the President's desk.

Given the environmental, public health, border security, and national safety concerns, it is especially important that we act immediately to control the flow of trash from Canada.

I'd like to thank Chairman DINGELL for his leadership on this issue, and I encourage my colleagues to support this long overdue legislation.

TRIBUTE TO KEITH PETERS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 2007

Mr. DINGELL. Madam Speaker, I rise today to pay tribute to Keith Peters, who is retiring from his position as president and CEO of the Ypsilanti Area Chamber of Commerce. Keith has dedicated himself to bettering the Ypsilanti community for over 40 years.

Keith Peters was born in Grabill, Indiana, in 1941 and moved to Michigan for college in 1960. In 1964, he graduated from Great Lakes Christian College in Lansing and married Betty Jackson, his wife of 43 years. Keith honorably served the citizens of Ypsilanti from 1963 to 1983 as senior minister at First Christian Church in Ypsilanti.

After 20 years at First Christian, Keith changed directions and held a variety of positions within Ypsilanti's business community. In 1983, he served as production controller at Barfield Manufacturing in Ypsilanti. In 1989, Keith became sales manager at WAAM Radio in Ann Arbor.

Keith began his career at the Ypsilanti Area Chamber of Commerce in 1995 as membership director and small business advisor. After just 2 short years of hard work, a strong record of success, and proven dedication to the Ypsilanti business community, Keith became president and CEO of the Ypsilanti Area Chamber of Commerce. Keith's leadership at the Ypsilanti Chamber has yielded great results, such as the doubling of both its membership and budget, as well as the creation of the Ypsilanti Area Chamber Education Foundation in 2000.

Keith has also given of himself to the broader Ypsilanti community, serving on such boards as the Workforce Development Board; the Washtenaw Development Council Board; the Board of Elders of the Memorial Church of Christ; the Advisory Board of the Eastern Michigan University College of Education; the Michigan Chamber of Commerce Executives Board, to name a few.

Keith Peters has done tremendous work for his community. I am sure that his wife Betty, his two children, and his eight grandchildren are all very proud of him. Keith has provided spiritual, economic and educational wisdom and much of his time to the Ypsilanti area and I am proud to call him a friend: I wish him an adventurous and healthful retirement and am certain he will have great success in all of his future endeavors, both personal and professional.

TRIBUTE ON THE PASSING OF ERNEST GALLO

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 2007

Mr. HOYER. Madam Speaker, I rise today with a heavy heart as we mark the passing of a man that meant a great deal to the State of California and our Nation as a whole. Armed with nothing more than a \$5,900 investment and a winemaking pamphlet from the public library, Ernest Gallo—along with his brother, Julio—created one of the world's largest wineries out of a small family-owned business, employed thousands of hard-working Americans over the years, and revolutionized the way the wine industry operates in the United States.

And while his role as co-founder of the Gallo Winery may be his claim to fame, Ernest Gallo was also a generous philanthropist who willingly answered the call when his community needed him most. Ernest created an endowment at the Gallo Center for the Arts in Modesto, CA. He established the Ernest Gallo Clinic and Research Center at the University of California at San Francisco. And those are just two examples of his strong support for educational and health-related endeavors the world over.

Ernest Gallo was the personification of the American Dream—a self-made man who transformed his personal business successes into tangible public benefits that enhanced the lives of countless Americans. And I would like to extend my most heartfelt condolences to the family and friends of Ernest Gallo as we mourn his loss.

SOWING THE SEEDS THROUGH SCIENCE AND ENGINEERING RE- SEARCH ACT

SPEECH OF

HON. PATRICK J. KENNEDY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 24, 2007

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 363) to authorize appropriations for basic research and research infrastructure in science and engineering, and for support of graduate fellowships, and for other purposes:

Mr. KENNEDY. Mr. Chairman, I rise today in support of H.R. 362, the "10,000 Teachers, Ten Million Minds" Science and Math Scholarship Act, and H.R. 363, the Sowing the Seeds Through Science and Engineering Research Act.

For the past century or more, the United States has been the undisputed leader of the global economy. The reasons for this success are many and diverse, but they are united by the principle of innovation that has guided our economy for decades. The United States is the birthplace of aviation and the automobile. We have led the information technology revolution and created the internet. The names of American pioneers are as familiar to us as those of our greatest Presidents: Henry Ford, Robert Oppenheimer, Bill Gates.

But today, the supremacy of the United States in international innovation is at risk. In 2005, the National Academies convened a panel, known as the Augustine Commission, made up of some of the most distinguished national leaders in academia, industry and government. Their report, *Rising Above the Gathering Storm*, was startling. It expressed serious concern that "the scientific and technological building blocks critical to our economic leadership are eroding at a time when many other nations are gathering strength." In order to prevent this erosion and maintain the United States' place at the forefront of the global economy, the Commission proposed several concrete actions.

The "10,000 Teacher, Ten Million Minds" Science and Math Scholarship Act is the direct result of the Augustine Commission's first recommendation. In 2000, more than 85 percent of students in grades 5–9 were taught physical science by a teacher lacking a major or certification in the physical sciences. In 1999, 68 percent of U.S. 8th grade students received instruction from a mathematics teacher who did not hold a degree or certification in mathematics. This legislation will create thousands of new math and science teachers, each with expertise in their specific area of teaching, and will create centers for improvement of undergraduate education in science and mathematics.

The "Sowing the Seeds Through Science and Engineering Research Act" derives from the Augustine Commission's second recommendation. This legislation will improve innovation efforts at the National Science Foundation. It will especially focus on outstanding researchers in the early stages of their careers. These are the researchers who are most likely to break existing paradigms and realize that singular achievement that will keep the United States at the cutting edge of global innovation.

These bills are only the first step. In the weeks and months to come, the House will consider several bills that will encourage technological progress and innovation. I commend Speaker PELOSI for her initiative and commitment to the innovation agenda, and I urge passage of these bills.

RECOGNITION OF LEADERSHIP BY COLUMBIA GORGE COMMUNITY COLLEGE AND THE DALLES- WASCO COUNTY COMMUNITY OUTREACH TEAM

HON. GREG WALDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 2007

Mr. WALDEN of Oregon. Madam Speaker, I rise today to draw your and my fellow colleagues' attention to a tremendous and especially unique educational effort underway at
